PROFESSIONAL SUMMARY

Data analyst and former software developer with a Master of Data Analytics and hands-on experience turning raw business data into dashboards, KPI reporting and clear recommendations. Proficient in Python, SQL, Power BI, Tableau and Excel, with working knowledge of machine learning and full-stack development. Strong at turning complex analysis into practical decisions.

TECHNICAL SKILLS

Programming and Query Languages: Python, SQL, R, Java, C++, C#, JavaScript, PHP, HTML, CSS

Data Analytics and BI Tools: Power BI, Tableau, Microsoft Excel (PivotTables, VLOOKUP, Power Query), Google Analytics

Data and Machine Learning: Data Cleaning, Exploratory Data Analysis, Statistical Analysis, Predictive Modeling, Machine Learning, Data Visualization, Big Data Management

Software and Web Development: .NET Framework, Full-Stack Web Development, REST APIs, UI/UX Design, SEO Optimization

Other Technologies: Cybersecurity, Kali Linux, Ethical Hacking, IoT, CUDA, Cloud Computing

Core Competencies: KPI Tracking, Business Intelligence Reporting, Market Research, Requirements Gathering, Stakeholder Presentations, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Data Specialist at Happy Cramps | Brampton, Ontario, Canada | March 2026 – Present

- Own end-to-end analytics for a consumer wellness brand, consolidating sales, marketing and customer data into reliable datasets with SQL, Python and Excel (Power Query).
- Design and maintain Power BI and Tableau dashboards tracking revenue, customer acquisition, retention and product KPIs, giving leadership a clear, up-to-date view of business health.
- Analyze website and campaign performance in Google Analytics and apply statistical analysis and predictive modeling to uncover customer, channel and demand trends, presenting prioritized recommendations to founders and cross-functional teams.
- Automate recurring reports and data-quality checks with Python and SQL, cutting manual effort and improving accuracy.

Data Analyst Intern at Happy Cramps | Brampton, Ontario, Canada | January 2026 – March 2026

- Cleaned, validated and consolidated multi-source data with SQL and Excel (PivotTables, VLOOKUP, Power Query), and ran exploratory analysis in Python to uncover sales, customer and product trends.
- Built Power BI and Tableau KPI dashboards, partnering with stakeholders on requirements for self-serve reporting.

Sales Floor Associate at Winners (TJX) | Niagara Falls, Ontario, Canada | August 2025 – Present

- Deliver attentive, solution-focused customer service in a high-traffic retail environment, resolving inquiries quickly.

Software Developer at InfoServOps | Vadodara, Gujarat, India | February 2022 – July 2024

- Designed, developed and maintained full-stack web applications using C#/.NET Framework, JavaScript, HTML and CSS, turning business requirements into reliable, user-friendly features.
- Built and integrated REST APIs with relational databases, writing efficient SQL queries to power data-driven application features.
- Contributed across the software development lifecycle, from requirements to testing, debugging and release.
- Improved usability and discoverability through responsive UI/UX enhancements and on-page SEO optimization.
